Patient Determined Disease Steps

Please read the choices listed below and choose the one that best describes your own situation. **This scale focuses mainly on how well you walk.** You might not find a description that reflects your condition exactly, but please mark the **ONE** category that describes your situation the closest.

☐ 0 I may have some mild symptoms, mostly sensory due to MS/neurologic condition but they do not limit my activity. If I do have an attack, I return to normal when the attack has passed.

☐ 1 I have some noticeable symptoms from my MS/neurologic condition but they are minor and have only a small effect on my lifestyle.

☐ 2 I don't have any limitations in my walking ability. However, I do have significant problems due to MS/neurologic condition that limit daily activities in other ways.

☐ 3 My MS/neurologic condition does interfere with my activities, especially my walking. I can work a full day, but athletic or physically demanding activities are more difficult than they used to be. I usually don't need a cane or other assistance to walk, but I might need some assistance during an attack.

☐ 4 I use a cane or a single crutch or some other form of support (such as touching a wall or leaning on someone's arm) for walking all the time or part of the time, especially when walking outside. I think I can walk 25 feet in 20 seconds without a cane or crutch. I always need some assistance (cane or crutch) if I want to walk as far as 3 blocks.

☐ 5 To be able to walk 25 feet, I have to have a cane, crutch or someone to hold onto. I can get around the house or other buildings by holding onto furniture or touching the walls for support. I may use a scooter or wheelchair if I want to go greater distances.

☐ 6 To be able to walk as far as 25 feet I must have 2 canes or crutches or a walker. I may use a scooter or wheelchair for longer distances.

☐ 7 My main form of mobility is a wheelchair. I may be able to stand and/or take one or two steps, but I can't walk 25 feet, even with crutches or a walker.

☐ 8 Unable to sit in a wheelchair for more than one hour.

MSRS-R Assessment of Your Current Functioning
